

CODAN HF Remote Control Equipment

CODAN NGT HF Remote Control system

The CODAN NGT Remote Control System CODAN NRCS is the smart way to achieve clear and reliable communication when your transceiver site is located in an area affected by electrical interference. Clearer communication is achieved by relocating the CODAN NGT HF SSB transceiver and antenna system to an area with little or no electrical interference. Using an NRCS, the transceiver can be operated from a convenient location such as an office or workplace.

CODAN NGT HF Split-site remote control system

The CODAN NGT Split-site Remote Control System provides various options to ensure clear and reliable communication, for users whose control location is affected by electrical interference and limited by building constraints.
